

Project Engineer

Shape the Future of Ship Performance

Join the team behind one of the most innovative technologies in the maritime industry

What if your work could make vessels more efficient, more comfortable, and more sustainable?

At Hull Vane, that is exactly what we do. Our patented Hull Vane® technology is helping ship owners around the world reduce fuel consumption, improve seakeeping, and lower emissions. From award-winning superyachts and naval vessels to passenger ships and commercial fleets, our solutions are setting new standards in maritime performance.

As our business continues to grow internationally, we are looking for a passionate and ambitious Project Engineer to join our team.

Your Impact

As a Project Engineer, you will be at the heart of our projects, from initial engineering and design to installation, testing, and delivery.

You will work directly with shipyards, owners, naval architects, and suppliers to bring innovative technologies to life. Every project is different, offering a unique opportunity to work on a diverse range of vessels and continuously expand your expertise.

Whether you are reviewing engineering designs, coordinating with project stakeholders, analysing performance data, or attending sea trials, you will play a key role in delivering solutions that make a measurable difference.

This is not a desk-only engineering role. You will see your designs become reality and experience the results firsthand.

What Makes This Role Special?

At Hull Vane, innovation is at the core of everything we do, it is what drives us every day.

You will:

- Work on groundbreaking maritime technologies with global impact
- Be involved throughout the entire project lifecycle
- Collaborate with leading shipyards, designers, and operators worldwide
- Gain exposure to a wide variety of vessel types and engineering challenges
- Have the freedom to take ownership and contribute your ideas
- Grow your technical and project management skills in a highly specialised field

Most importantly, you will be part of a team that is genuinely passionate about improving ship performance.

Who Are We Looking For?

We are looking for someone who combines technical curiosity with a hands-on mindset.

You are excited by engineering challenges, enjoy working with people, and are motivated by creating practical solutions that deliver real-world results.

You bring:

- A degree in Maritime Engineering, Naval Architecture, or a related field
- Bachelor's level education or equivalent
- Preferably 3+ years of relevant work experience
- Experience with CAD software
- Familiarity with AutoCAD and Rhino is an advantage
- Knowledge of structural design, CFD and/or FEA is a plus
- Strong communication skills and a collaborative mindset
- A proactive and solution-oriented approach
- Excellent spoken and written English
- Residency in the Netherlands (or willingness to relocate), an EU work permit valid in the Netherlands

Do not tick every box? We would still love to hear from you. We believe talent, motivation and a willingness to learn are just as important as experience.

Why Hull Vane?

At [Hull Vane BV](#), you will join a growing international company that combines cutting-edge technology with an entrepreneurial spirit.

Our team consists of engineers, project managers, and maritime professionals who share a common goal: creating smarter, more sustainable vessels.

We offer an environment where ideas are welcomed, initiative is rewarded, and professional growth is actively supported.

At the same time, we believe work should be enjoyable. We maintain an open and informal culture, with regular team activities, shared lunches, walks, social events, and plenty of opportunities to connect with colleagues.

What We Offer

- A challenging role for 32–40 hours per week
 - Competitive salary aligned with your experience and expertise
 - Flexible working hours
 - 25 vacation days in addition to Dutch public holidays
-

- Continuous learning and development opportunities
- International projects with leading maritime clients
- A collaborative and innovative working environment
- A team that values initiative, creativity, and personal growth

Ready to Make an Impact?

If you are passionate about engineering, excited by innovation, and eager to contribute to the future of maritime performance, we would love to meet you.

Send your CV and motivation letter to info@hullvane.com or contact us at +31 (0)317 425 818 for more information.

Join Hull Vane and help redefine what ships can achieve.
